

SAHIL NAYAK

Full Stack Developer

Bhubaneswar, Odisha | +91 7894838425 | nayaksahil445@gmail.com

[LinkedIn Profile](#) | [GitHub Profile](#)

PROFESSIONAL SUMMARY

Results-driven Full Stack Developer and Computer Science and Data Science undergraduate with a strong foundation in front-end, backend, and database development. Skilled in building responsive, scalable web applications using HTML, CSS, JavaScript, and SQL, with growing expertise in MERN stack development. Delivered award-winning, real-world software, including a full-stack startup platform and an AI-powered attendance system. Seeking a Full Stack Developer / Software Engineer role to deliver immediate, measurable impact.

TECHNICAL SKILLS

Languages: C, Java, HTML, CSS, JavaScript, SQL

Web Technologies: HTML5, CSS3, Responsive Web Design

Tools & Databases: MySQL, SQLite, Git, GitHub, Eclipse IDE

Concepts: Full Stack Development, REST APIs, MERN Stack (Learning), Database Management, Artificial Intelligence, Internet of Things (IoT)

Productivity: Microsoft Office, PowerPoint, Excel

Operating Systems: Windows, Linux

INTERNSHIPS & CERTIFICATIONS

Artificial Intelligence & Machine Learning Intern | Central Tool & Training Center, Bhubaneswar | 2025

- Completed a one-month hands-on internship covering supervised learning, model evaluation, and AI application development.

Advanced C Programming Intern | Lakshya Institute of Technology, Bhubaneswar | 2024

- Completed a one-month intensive internship focused on pointers, data structures, and memory management in C.

Front-End Development Certification, Meta (Coursera) | Introduction to Front-End Development

- Completed certification covering HTML, CSS, responsive design, and core JavaScript fundamentals.

PROJECTS

Odisha Service Point (OSP) - Web-Based Startup Platform | Tech Stack: HTML, CSS, JavaScript, MySQL

[\[Live Demo\]](#) | [\[Vercel Project\]](#)

- Designed and developed a full-stack web platform connecting local service providers with customers across Odisha, improving service discoverability for users statewide.
- Implemented secure user authentication, role-based service listings, and dynamic search functionality to streamline the service-matching process.
- Built a fully responsive front-end interface optimized for desktop and mobile devices, ensuring consistent user experience across platforms.
- Developed an admin dashboard for managing users, services, and requests, improving operational efficiency and platform administration.
- Awarded 1st Place at the BPUT Project Exhibition 2025 for technical excellence and real-world applicability.

Smart Attendance System Using Face Recognition | Tech Stack: Python, OpenCV, Face Recognition, SQLite/MySQL

[\[Live Demo\]](#) | [\[Vercel Project\]](#)

- Developed an AI-powered attendance system using facial recognition technology to automate identity verification.
- Implemented real-time face detection and recognition using OpenCV, enabling accurate and efficient attendance tracking.
- Automated attendance recording and storage in a database, eliminating manual data entry.
- Reduced manual attendance effort and minimized proxy attendance through automated, tamper-resistant tracking.
- Built a simple, user-friendly attendance management system suitable for classroom and organizational use.

EDUCATION

B.Tech - Computer Science & Data Science Engineering | Bhubaneswar Engineering College | 2023 - 2027

CGPA: 8.00 / 10.0

ACHIEVEMENTS

- 1st Place, BPUT Project Exhibition 2025: Awarded for the OSP (Odisha Service Point) web platform project.
- Winner, Hackathon TechSpire 1.0, Nalanda Institute of Technology, Bhubaneswar: Team Alpha Coders, Theme Tourism,

Utkalpreneur E-Fest 2025. Recognized for outstanding creativity, technical excellence, and dedication in shaping the future of technology.

- 2nd Place, College-Level Coding Competition: Secured runner-up position among peers in a college coding contest.
